 Human transforming growth factor-beta complementary DNA sequence and expression in normal and transformed cells
Nature 316 (6030), 701-705 (1985)
85296301.
The sequence downstream from the translational stop codon (2015-2017) was taken from a genomic clone.
                                                                                                                                                                                                                                                                                                                                                      2
